+971507857682

Certified IT and Cybersecurity professional with over 7 years of technical experience across IT Support, Full-Stack Development, and Security Operations. CompTIA Security+ certified (CySA+ candidate) with a proven track record of building secure, Meta-certified full-stack applications. Hands-on experience in SOC operations, having designed and managed a dedicated lab environment utilizing Microsoft Sentinel for unified threat monitoring, log analysis, and incident response across Kali Linux, Windows, and Ubuntu servers. Currently leveraging my technical foundation in a high-stakes Surveillance and CCTV Security role in Dubai. I offer a unique '360-degree' perspective—combining digital threat detection with real-world operational security. I am seeking to transition into a Junior SOC Analyst or Security Engineer role, offering a valid UAE Residence Visa.

Willing to relocate: Anywhere

Personal Details

Eligible to work in United Arab Emirates: Yes

Industry: Administrative Assistance, Aerospace & Aviation, Analytics, Banking & Finance, IT Operations & Helpdesk, Information Design & Documentation, Installation & Maintenance, Security & Public Safety, Software Development, Technology

Work Experience

Security Guard/CCTV Operator

Affordable group of companies-Dubai International City

December 2025 to Present

- **Systems Monitoring & Surveillance:** Manage and monitor high-definition CCTV networks and Integrated Security Systems, ensuring 100% operational uptime and immediate identification of security anomalies.
- **Incident Response & Documentation:** Act as the first responder for site incidents, performing real-time alert triage and maintaining detailed digital logs for audit and law enforcement purposes.
- **Analytical Observation:** Utilize advanced Video Management Software (VMS) to detect patterns, conduct forensic video reviews, and identify potential physical or technical vulnerabilities.
- **Technical Troubleshooting:** Perform basic Level 1 maintenance on surveillance hardware and network connectivity, ensuring seamless data transmission between cameras and recording servers.
- **Access Control Management:** Oversee physical access control systems (biometrics/RFID), ensuring that only authorized personnel enter restricted zones—aligning with strict corporate security policies.
- **Crisis Management & Communication:** Coordinate with emergency services and management during critical events, demonstrating calm under pressure and clear technical communication.

Full Stack Web Developer

Wupoh-Douala

May 2023 to October 2025

- **Secure Application Design:** Designed and deployed over 5 custom web applications and e-commerce platforms using Meta-certified front-end and back-end frameworks, with a primary focus on Application Security (AppSec).
- **Vulnerability Remediation:** Implemented robust defenses against OWASP Top 10 threats, including SQL Injection (SQLi), Cross-Site Scripting (XSS), and Cross-Site Request Forgery (CSRF).

- Identity & Access Management (IAM): Configured secure user authentication and authorization systems using JWT (JSON Web Tokens) and role-based access controls (RBAC).
- Encryption & Data Protection: Integrated SSL/TLS for data-in-transit and applied hashing/salting (e.g., bcrypt) for sensitive user data-at-rest.
- Infrastructure Hosting: Managed end-to-end hosting for a private dating application, ensuring server hardening and secure DNS/SSL configurations for high-traffic environments.

IT Support

Olabi Telecom-Douala

March 2018 to May 2023

- Network & Infrastructure Security: Managed and maintained secure office networks, including the configuration of routers, switches, and firewalls to ensure 99.9% uptime and protection against unauthorized access.
- System Hardening: Performed regular OS hardening for Windows and Linux environments, managing security patches, antivirus deployments (EDR/AV), and system updates across 50+ workstations and servers.
- Identity & Access Management (IAM): Administered Active Directory (AD) and Microsoft 365, managing user permissions, group policies (GPOs), and implementing Multi-Factor Authentication (MFA) to secure corporate data.
- Incident Response & Troubleshooting: Served as the first point of contact for technical incidents, identifying root causes of hardware/software failures and resolving network connectivity issues under strict SLAs.
- Backup & Disaster Recovery: Monitored and managed daily data backup processes and recovery procedures, ensuring business continuity and data integrity in line with company security policies.

Education

Science Stream (High School Graduate)

Progressive Comprehensive High School-Mankon Bamenda, Cameroon

August 2012 to June 2014

Skills

- Access Control & Cryptography
- Surveillance Operations
- Security Monitoring
- Front-End Technologies
- Database Management
- Technical Communication
- Threat Detection & Analysis
- Physical-Digital Integration
- Analytical Thinking
- Time Management
- DevOps & Deployment
- Back-End Development
- Vulnerability Management
- Incident Response

- Secure Coding
- IT Infrastructure
